
C IV λ1548 f = 0.19, b_fid = 12.8 km s^−1, τ_0 = 1 at log N = 13.46
single component, b = 6 km s^−1
single component, b = 14 km s^−1
single component, b = 26 km s^−1
two components, log N = 12.9 each
two components, log N = 13.5 each
two components, log N = 14.1 each
S/N per resolution element
resolving power R
min. detectable log N (3σ)
Δv_min [km s^−1] (3σ)
COS G140L
COS G130M/G160M
STIS E140M
HIRES/UVES
Δv_min = Δv_S (Sparrow); above: resolved below the classical limit
existing spectrographs (nominal R)
